

ABOUT ME

I am a UX Designer based in Indore, where I was born and raised. I completed my higher secondary education from MSB and went on to pursue a BCA from Medi-Caps University. I began my career as a Graphic and Web Designer and gradually transitioned into a self-taught UX Designer.

I have over five years of experience in a service-based organization, where I worked on multiple products across different domains. My role involved crafting customer experiences for web applications, mobile apps, and websites. Currently, I work at a product-based company, Workpulse, which offers an end-to-end management platform for QSR restaurants in the US market.

WHY FLEXIBEL?

Although the role you are currently hiring for may not directly align with my background, I would value the opportunity to work with your organization because the impact you are creating in the field of manufacturing is remarkable. I would like to gain hands-on experience and build the confidence required to understand customers and operations at the ground level.

I BRING WITH ME

- Strong communication skills
- Effective team management and collaboration
- Highly organized with attention to detail
- Solid IT expertise, especially in design and user experience
- Strong problem-solving abilities with creative thinking
- Curious and eager to continuously learn new skills
- Dedicated, dependable, and committed to quality work

WHY STEPPING INTO A DIFFERENT FIELD?

I believe that exposure within your organization would significantly help shape my future entrepreneurial journey. Over the next five years, I see myself growing in a field beyond IT. I have a strong interest in the manufacturing sector, which is why I chose Flexibel.

My ultimate goal is growth—both personal and professional. While I understand that I may not be a perfect fit for the role I applied for, I am eager to contribute by leveraging any skills that can help me build confidence and develop a strong foundation for doing business.
